**Subject:** RE: Grenada - August Sampling

Ted - As an update to my last email, I've confirmed with Shelby that the primary focus of the August sampling will be ambient air; however, there will now be some groundwater sampling - particularly, hanging biotrap in groundwater wells - to obtain more information about possible incomplete degradation of TCE in the groundwater. We can provide more context and info if needed. Just let us know.

**Subject:** Grenada - August Sampling

Good morning, Ted. The current plan for August sampling is only ambient air during the week of August 13. Likely to mobilize on August 13, sampling August 14-15, and demobilize on August 15 or 16. Attached is the postcard that will be going out to the community regarding the sampling.

Also, FYI, we have yet to receive validated results for the July sampling, but will let you know when we do.
